

Recommended Equalizer Settings for NewTec Speakers

Equalization Curve – single Frequency Points

	●	●	●	●	●	●	●
Frequency	56,50 Hz	95,24 Hz	123,53 Hz	230,00 Hz	5481,00 Hz	9221,36 Hz	5847,44 Hz
Filter Type	HighPass 2°	EQ (QFactor)	EQ (QFactor)	EQ (QFactor)	EQ (QFactor)	EQ (QFactor)	High Shelf
Gain		+7,81 dB	+4,64 dB	-5,00 dB	-10,98 dB	-10,98 dB	3 dB
Q Value		2.05	2.85	3.02	5.21	5.54	1.37

This Equalizer settings make the NewTec speakers flat in the Frequency-Range from 80 Hz to 20.000 Hz. Once applied, the speaker reproduces linearly in a tolerance band with +/-3dB.

With this settings speaker sounds more solid with a stronger Bassline and smother in the highs. He also gets a better playback on sibilants and sounds less sharp.
